		-0.28	
		-0.31	

The USD has reclaimed more ground against its major counterparts today as a lack of economic data and indifferent performance in equity markets provided little stimulus for risk appetite. The DXY is now comfortably above the 76-handle at 76.20; with EURUSD back around 1.4800 levels and USDCHF testing major resistance up at 1.0250.

The main market-moving news this morning was Swedish PPI data...
